Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 July 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, species b) figures 6C-6E, claims 51-64, and 73 in Paper No. 9 is acknowledged. The traversal is on the ground(s) that it would have not been a serious burden to search for species a and b, (claims 51-64, 72, and 73 will uncover references directed toward the species including figures 6A-6B as well as the species including Figures 6C and 6E, since the elements called for in claims 57-60 can be configured as shown in the embodiment of figures 6C-6E), and thus claim 51 is generic to both species as set forth in the office action. This is not found persuasive because the fact that a claim does so read in several species is not conclusive that it is generic. It may define only an element or subcombination common to the several species. (MPEP 806.04(d and e)). Furthermore, Applicant's disclosure set forth that both are different species.

The requirement is still deemed proper and is therefore made FINAL.

2. Please note that claim 72 has been withdrawn from consideration by the examiner as being drawn to a non-elected species. The elected species does not show a multi-way valve.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the instructional material as set forth in claim 73 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 57-60 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- Claim 57 is indefinite because it is not clear from the claim and the drawings how the second hollow body (line 1) contains the at least one compartment when in figure 6E is shown that the first hollow body is the one that has the compartment.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 51, 54, 57, 60, and 64 are rejected under 35 U.S.C. 102(b) as being anticipated by Engelsher et al (US 3,570,486).

Engelsher discloses a syringe device for delivering a medicament having a first hollow body 12 with a flow orifice (chamber 30), a first fluid access port 18, and a first pressure orifice at the rear end portion of body 12. A second hollow body 68 having a

second fluid access port 52 in fluid communication with the interior of the second hollow body and in fluid communication with the first access port, and an outlet port 64,66 in fluid communication with the interior of the second hollow body, and a first pressure modulator 28 connected to the first pressure orifice.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 55 and 56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Engelsher.

Engelsher discloses the invention substantially as claimed. However, Engelsher fails to disclose the pharmacological agent being nitric oxide donor compound, or a single human intrathecal delivery amount of the nitric oxide donor compound. It would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute one pharmacological agent for another since Engelsher is capable of delivering a medicament to a patient.

Allowable Subject Matter

10. Claims 52, 53, and 61-63 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3763

11. Claims 58 and 59 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
12. Claim 73 is allowable over the prior art of record.

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See 892-form.
